FEATURED PROJECTS

Hologram Fan Array (Fusion5)

Controller App

Developed the **first-ever hologram built in Sri Lanka** with a vertical overlapping mechanism. Drives dual ESP32-S3 controllers for POV LED rendering, polls ultrasonic safety shields, and broadcasts real-time statistics over WebSockets.

ESP32-S3 Arduino C++ FastLED WebSockets Hardware

Lost & Found System

Backend Frontend

Full-stack web app for campus lost item reporting & recovery. Spring Security JWT auth, MySQL database, and React TypeScript UI.

React (TS) Spring Boot MySQL JWT Auth

airDraw Canvas

Repository

Computer vision air-writing application tracking hand gestures via webcam to draw on a virtual canvas in real-time using OpenCV and MediaPipe.

Python OpenCV MediaPipe

Course Registrar

Repository

Desktop course registration app with rich JavaFX GUI backed by a relational MySQL database, applying OOP and layered architecture patterns.

JavaFX Java OOP MySQL

FutureTech Shop

Repo Live

Responsive online tech shop landing page with smooth animations, modern UI design, and live deployment on GitHub Pages.
